Table 1: Descripción

## 3 Mount and umount

Delete swap partition: `swapof /dev/swapp file` or the direction you choose.

Unmount a partition linux filesystem `umount -option direction+unmount+filesystems`

for more information <https://man.archlinux.org/man/umount.8.en>

If you create a EFI partition do later swamp and mount the home and mnt

`mkfs.fat -F 32 /dev/efi-system-partition.`

To enable multilib repository, uncomment the [multilib] section in /etc/pacman.conf:

`/etc/pacman.conf [multilib] Include = /etc/pacman.d/mirrorlist`

New terminal `alt + f2`

Keyboard distro in spanish later to the fierst time in qtile write in terminal

`setxkbmap es`

Refresh qtile `mod + ctrl + r`

Keyboard ditro es in qtile `setxkbmap es`
